

## **Play Equipment Guidelines**

*All play equipment needs prior written approval from the ACC. All play equipment is approved on a case-by-case basis by the ACC. Detailed product specifications and a site plan locating the equipment on the property need to accompany the application. All play equipment should be located behind the house when possible so as to minimize the visibility from the street.*

*The ACC does NOT require an “Application for Approval” on swings (limited to those without ‘standing platforms’), trampolines, and basketball goals. As long as the play equipment is located in a position to minimize visibility from the street, maintained in an orderly fashion, and not cause justified complaints the above equipment will remain outside of the purview of the ACC. Playhouses and ‘forts’ are not included in the above exception, they will require written ACC approval.*
